Input count at the crosspoint

Input count:

8

Upstream keyer count for this M/E bank

Upstream overlay count:

4

Downstream keyer count for this M/E bank

Downstream overlay count:

2

Background layer scaling mode

Video scaling mode:

Stretch

Background layer scaling filter

Video scaling filter:

Nearest

Resolution of the processed frames

Resolution:

1920x1080

Pixel aspect ratio of the processed frames

Pixel aspect ratio:

1/1

RGB color primaries used when mixing

Color primaries:

bt601_625

Color model used when mixing.
Always RGB

Color model:

rgb

EOTF of the resulting frame

Color transfer function:

linear

Color subsampling scheme of the
resulting frame. Always 4:4:4

Color subsampling:

4:4:4

Color range of the resulting frame.
Always full

Color range:

full

Pixel format. Determines the color depth

Color format:

A1R5G5B5_16
